**Sidharth Mahapatra, Experience: 3 Years**

"The concepts of R programming and Machine Learning will be taught by Prof. Chandrasekhar Ramanathan and Prof. G Srinivasaraghavan respectively. Both of them have been listed in the top twenty prominent data science academicians list published by Analytics India Magazine. So you need not worry about the quality of teaching in this program."

**Tuhin Pal, Experience: 5 Years**

"I appreciate the platform upGrad how they have arranged the modules and the assignments are quality ones. You will relish your college days again as the exams felt like semester ones, where you can't talk to anybody. Modules are locked till you complete the previous one so until you clear a semester, you can't move to the next one."

Harkirat Dhillon, Experience: 8 Years

"A dedicated regimen for studying the program and keep learning is the key to being successful and passing the program. This program will help build a strong foundation for a successful transition to data science. Additionally, participating in hackathons and Kaggle competitions to solve real-world problems will give you an edge and land a job if one is willing to work hard."

**Shravani Shahapure, Experience: 16 Years**

"For someone who passionately wants to pursue a career in the field of data science, it is worth to opt for the complete program by IIIT B and upGrad. Data science is an experimental science. We need to develop the right kind of thinking ability to approach problems. And to develop this ability, we need expert's direction. Knowing tools won't solve the problems always, we need to use them wisely and correctly. IIITB and upGrad's online program on data science gives this opportunity and develop students for their future as they provide the best professors, thought-provoking assignments and case studies."

Sagar Tekwani, Experience: 2 Years

"A very well-structured and well-balanced program content which you won't get in other programs/hano-degrees. Being a beginner in DS, I found the structure of the Executive PG Programme from IIITB and powered by upGrad most helpful. They even teach you most of the prerequisites with prep sessions before you even start the program. Being a working professional, it was neither too difficult nor too easy to keep up with the pace of the program."
